

# 6 Reasons for buying "by the pound."

1. There is no printing and less than half of the amount of paper used "by the pound" as there is used for the fancy packages.
2. You pay at least 10 per cent more for packaged goods for this reason: When you buy a package of cakes, crackers, dried fruit or some other thing that you often buy in package, you pay for the labor of packing at the factory, for the package and the advertising and every one has his profit on it before you the customer get it.
3. You can see the quality of "by the pound" foods before buying them and can examine them.
4. You can buy just the amount you need and no more for we will gladly sell you any part of a pound that you wish.
5. You can get the same quality of goods for a large per cent less by buying "by the pound" from bulk.
6. You are not paying for an extravagant and unnecessary package which has no value to you and which is thrown away as soon as you get it home.

## Warning!

See that it is a **SHERERIZED** store in which you buy your "by the pound" foods--then you can be sure that you are getting food which is kept clean.
